FAST RADIUS AT A GLANCE

WE ARE A SOFTWARE COMPANY...

... AND WE MAKE PARTS

OPERATIONS

Chicago (HQ)
Atlanta
Hong Kong
Louisville
Singapore

CLOUD MANUFACTURING PLATFORM™ INFRASTRUCTURE

Proprietary software platform powers end to end experience, factory and network operations

Growing library of apps and services running on the cloud

Three factories + global supplier network

Recognized as one of nine most advanced factories in the world

CUSTOMERS

10+ million parts produced

61,000 unique designs

Many Fortune 500 companies

Current Fast Radius manufacturing infrastructure

Carbon DLS Factory
Chicago, IL

Recognized as an Industry 4.0 Manufacturing Lighthouse

Carbon

Preferred Carbon Automotive Production Partner

HP MJF Factory
Chicago, IL

Member of the HP Digital Manufacturing Network

Stratasys FDM Factory
Louisville, KY

Located at UPS Worldport

Fast Radius Global Network

Fast Radius has nodes of production and offices around the globe, with our HQ in Chicago, a factory at the UPS Worldport in Louisville, and operations in Atlanta, Singapore, and Hong Kong. A strategic partnership with UPS enables a global reach.

Introducing the Fast Radius Cloud Manufacturing Platform™

The first of its kind platform for driving innovation in manufacturing... just as seen in cloud compute

Our platform

Our product is a Cloud Manufacturing Platform that allows engineers to get insights and parts on-demand when they need them

Provides scalable, cutting-edge access to manufacturing for everyone with a browser

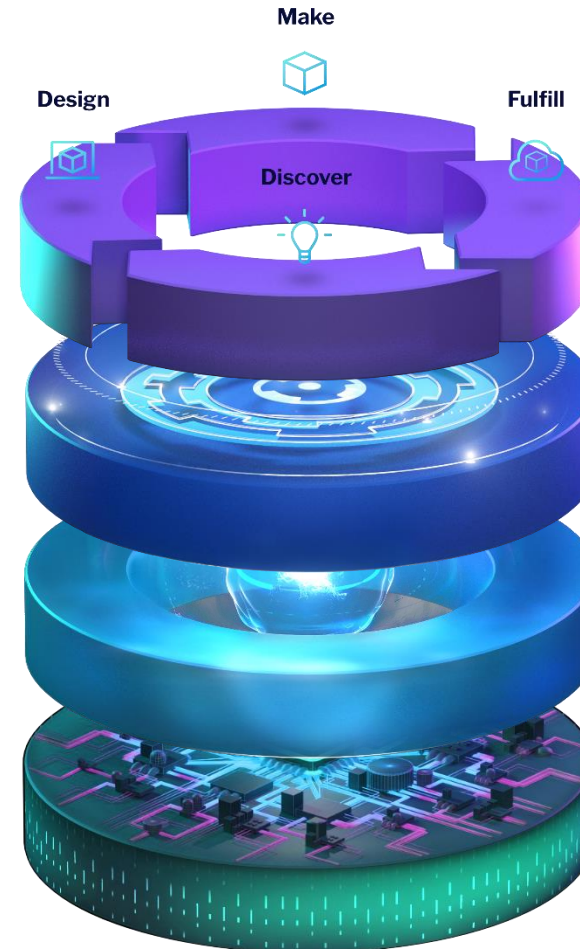

Delivers real-time actionable intelligence across the product lifecycle

Applications & Services

Operating System

Learning Engine & Digital Thread

Infrastructure (factories + data)

Customer-facing application and services platform.

FAST RADIUS. Additive Launch FAST RADIUS. On Demand FAST RADIUS. Virtual Warehouse™

Software OS platform to power the end-to-end customer experience.

Digital Thread is the DNA of how every part is made.

Learning Engine allows us to analyze the data we collect, getting smarter with every part we make.

Digitally connected factories

Ways we partner with customers

Finished good production and fulfillment

- Production-grade qualification and manufacturing with latest additive technologies
- Hosted Additive Manufacturing Capacity
- Virtual Warehouse™ service provided with UPS

Application Launch

- New product development support
- Intensive design workshops
- Design for additive manufacturing (DfAM) training and guidance

Training and part identification

- Application discovery workshops and webinars
- Total Value of Additive™ business case development
- Organizational change leadership

OUR MISSION: MAKE NEW THINGS POSSIBLE

Manufacturing is important, not just for what it makes, but what it makes possible for the world.

THANK YOU
